RE: Application for Water Right Permit

Dear Water Resources Staff;

Please find enclosed an *Application for Water Right* to appropriate additional water from several of our existing wells.

Currently, the Riviera Community Club Water System holds water rights in the amount of 355 ac-ft/year. While adequate for our current use, these rights assumed a water duty based on 25% occupancy. In actuality however, many lots are occupied on a full-time basis, and we see an increasing trend towards year-round residences. Using current water demand trends and assuming full build-out, our system will ultimately need water rights for 843 ac-ft/yr; accordingly we will need an additional 488 ac-ft/yr.

Our withdrawal points will remain our existing wells – specifically Wells 2, 3, 4 and 7, and we do not anticipate constructing additional wells at this time.

We would be happy to provide additional information on both our water needs and system infrastructure once the Department begins its review of this application. Please contact me at (253) 884-4093 if you have further questions.

Russ Rodocker
